EDUCATION

•MOTILAL NEHRU NATIONAL INSTITUTE OF TECHNOLOGY ALLAHABAD

2021-2025

B.Tech. in Computer Science and Engineering

CPI: 8.23

•ST JOHN SENIOR SECONDARY SCHOOL DUMRAON

2018-2020

12th, Central Board of Secondary Education

Percentage: 92.2%

EXPERIENCE

•Marvell Technology Software Engineer (Intern → Full-Time) May 2024 - June 2024 / Jan 2025 - current

- Designed and automated scalable Python-based test frameworks using PyTest and Paramiko to validate distributed storage systems, reducing manual validation effort by approx 90-95%
- Collaborated with cross-functional teams (firmware, systems, cloud) to ensure reliability and performance across NVMe storage, virtualization, and cloud infrastructure.
- Owned end-to-end lifecycle of test modules: design → implementation → execution → failure analysis, aligning with operational excellence principles.
- Integrated automated test frameworks into internal build and validation pipelines, supporting continuous integration and release workflows.
- Investigated and analyzed test failures and system issues to improve stability and prevent regressions.

PERSONAL PROJECTS

•Complaint Box

November, 2022

Dailylife Problem Solving Website [Live Link](#) [Github Repository Link](#)

- Designed and developed a full-stack web application to solve real-world daily-life complaint management for users and administrators.
- Implemented authentication workflows (email verification, password reset, role-based access) with secure session management.
- Designed APIs and database schema to handle concurrent users and extensible feature growth.
- Focused on clean, maintainable code, modular design, and extensibility.
- Built admin workflows for issue resolution, improving response transparency and user experience.
- **TechStack** : NodeJS, MongoDB, JavaScript, EJS, CSS, HTML.

•Video Summarization

November, 2024

Video Summarizer [Github Repository Link](#)

- Built an AI-powered video summarization system using BiLSTM/LSTM with Luong attention to generate concise summaries.
- Applied Particle Swarm Optimization (PSO) to improve summary quality and relevance.
- Implemented video segmentation pipelines using KTS, handling large video inputs efficiently.
- Trained and evaluated models on SumMe and TVSum datasets, validating performance and robustness.
- Leveraged PyTorch, OpenCV, and ResNet for feature extraction and model training.
- **TechStack** : Python, PyTorch, LSTM and BiLSTM, PSO, OpenCV, ResNet, Luong Attention, NumPy, Pandas

TECHNICAL SKILLS

Languages: C++, Python

Core CS: Data Structures, Algorithms, OOP, Operating Systems, DBMS, Distributed Systems

Backend & Systems: Node.js, Express.js, REST APIs

Cloud/Databases: SQL, MongoDB

Dev & Ops Tools: Git, Linux, CI/CD pipelines, Jira, Confluence, Gerrit

ML/AI: PyTorch, LSTM/BiLSTM, OpenCV

AREA OF INTERESTS

- Data Structure and Algorithms
- Machine Learning
- Web Development

ACHIEVEMENTS

Knight on LeetCode (**Top 5%**, Rating 1871)

Global Rank **468** in CodeChef Starters 88
